

INTERNATIONAL
SUPPLY CHAIN MANAGEMENT

Environmental Statement

This statement, which applies to International Supply Chain Management Limited, sets out ISCM Limited's environmental-footprint strategy and how we seek to deliver against it.

We recognize our responsibility to help protect the planet. We are committed to minimizing the impact our organisation has on the environment and supporting those who are working to improve global environmental sustainability.

ISCM Limited supports the UN Sustainable Development Goals and the Paris Climate Agreement.

Core elements of our strategy

Our environmental-footprint strategy seeks to address greenhouse-gas (GHG) emissions and waste across our entire operation as we strive to continually strengthen our environmental practices.

We will comply with all applicable environmental laws and regulations.

Carbon neutrality

We recognize that GHG emissions represent a significant part of our firm's environmental footprint, from the electricity we use in our offices to the travel our people undertake.

Our approach to carbon neutrality includes reducing our emissions and investing in verified carbon-reduction projects to offset the emissions we have not yet been able to eliminate.

- We review all non-essential travel, and look to seek alternative arrangements where possible
- When required to travel, we aim to use transport with the lowest impact, ensuring we use public transport and alternative methods where possible

Reducing waste

We are committed to reducing waste across our operational sites.

- We aim to reduce waste generation at the source and seek to minimize the waste we send to landfill.

- We promote reuse and recycling, as well as the use of supplies that are recycled and recyclable and whose production and use minimize the consumption of natural resources. Specifically, we aim to reduce our consumption of single-use plastics, use environmentally friendly paper, and recycle where possible, including plastics and large electronic equipment.
- We encourage our offices to drive initiatives to reduce waste, including sorting and recycling materials, donating used technology equipment, putting drinking water taps in place, reducing food waste, and running recycling campaigns.

Working with external stakeholders

We are committed to working with our suppliers, clients, and other stakeholders to reduce their environmental footprint.

- As part of our sustainable procurement strategy, we have adopted a Supplier Code of Conduct, which sets forth our expectations of our suppliers, including reducing environmental impact. All (100%) of our suppliers are expected to adhere to our Supplier Code of Conduct.
- We have signed up to the “Business Climate Hub” and provided our commitment to achieve a Carbon Neutral Position by 2050
